

**Guess**

- I can guess which “friendly number” will be close to my the real answer  
OR
- I can add together friendly numbers that are close to the real numbers to find a good guess.

**Draw**

- I can draw my addition equation.
- I could draw base-ten blocks, tallies, a number line, a bar model, or any other picture that shows addition using the right numbers.

**Calculate**

- I can add the numbers together to find the answer.
- I can show how I got the answer (writing the answer by itself isn't enough!).

**Math Story**

- I can write a three-part math story.
- I can show how many of something I started with, then how many more I got, and how many I had in the end.

## Subtraction - Proficient

Emerging	Developing	Subtraction - Proficient		Extending
		<b>Estimate</b>	<ul style="list-style-type: none"><li>• I can use a strategy to change the numbers so they are “friendly,” then subtract to find my estimate (You might round one or both numbers, or use a different strategy).<ul style="list-style-type: none"><li>◦ Writing your estimate without showing how you found it is not enough.</li></ul></li></ul>	
		<b>Drawing and Explanation</b>	<ul style="list-style-type: none"><li>• I can show that I understand subtraction by using a drawing with the right numbers.<ul style="list-style-type: none"><li>◦ I could draw base-ten blocks, a bar model, number bonds, or another type of picture.</li><li>◦ Just changing the numbers in the equation into base-ten blocks does not show subtraction.</li></ul></li><li>• I can use words to explain what my drawing is showing.</li></ul>	
		<b>Calculate</b>	<ul style="list-style-type: none"><li>• I can use any strategy I know to solve the subtraction problem.</li><li>• I can regroup when I need to.</li><li>• I can show all of my work and not just the answer.</li><li>• I can check my estimate to see if my answer makes sense.</li></ul>	
		<b>Real Life/ Word Problem</b>	<ul style="list-style-type: none"><li>• I can write a real-life example that shows subtraction <u>OR</u></li><li>• I can write a word problem that shows subtraction.</li><li>• I can use the same numbers that we’re using for the rest of this SNAP.</li></ul>	
		<b>Reflect</b>	<ul style="list-style-type: none"><li>• I can find something I was good at, something I found hard, and something I want to get better at (Strength, Stretch, Goal).</li><li>• I can think more deeply than “It was all easy,” “It was all hard,” or “I don’t know.”</li></ul>	

# Multiplication - Proficient

Emerging	Developing	Multiplication - Proficient		Extending
		<b>Estimate</b>	<ul style="list-style-type: none"> <li>I can use a strategy to change the numbers so they are “friendly,” then multiply to find my estimate (You might round or use a different strategy).           <ul style="list-style-type: none"> <li>Writing your estimate without showing how you found it is not enough.</li> </ul> </li> </ul>	
		<b>Drawing and Explanation</b>	<ul style="list-style-type: none"> <li>I can show that I understand multiplication by using a drawing with the right numbers.           <ul style="list-style-type: none"> <li>I could draw base-ten blocks, a bar model, number bonds, or another type of picture.</li> <li>Just changing the numbers in the equation into base-ten blocks does not show multiplication.</li> </ul> </li> <li>I can use words to explain what my drawing is showing.</li> </ul>	
		<b>Calculate</b>	<ul style="list-style-type: none"> <li>I can use any strategy I know to solve the multiplication problem.</li> <li>I can show all of my work and not just the answer.</li> <li>I can check my estimate to see if my answer makes sense.</li> </ul>	
		<b>Real Life/ Word Problem</b>	<ul style="list-style-type: none"> <li>I can write a real-life example that shows multiplication <u>OR</u></li> <li>I can write a word problem that shows multiplication.</li> <li>I can use the same numbers that we’re using for the rest of this SNAP.</li> </ul>	
		<b>Reflect</b>	<ul style="list-style-type: none"> <li>I can find something I was good at, something I found hard, and something I want to get better at (Strength, Stretch, Goal).</li> <li>I can think more deeply than “It was all easy,” “It was all hard,” or “I don’t know.”</li> </ul>	

Emerging	Developing	Division - Proficient			Extending
		<b>Estimate</b>	<ul style="list-style-type: none"> <li>• I can use a strategy to change the numbers so they are “friendly,” then divide to find my estimate (You might round or use a different strategy).           <ul style="list-style-type: none"> <li>◦ Writing your estimate without showing how you found it is not enough.</li> </ul> </li> </ul>		
		<b>Drawing and Explanation</b>	<ul style="list-style-type: none"> <li>• I can show that I understand division by using a drawing with the right numbers.           <ul style="list-style-type: none"> <li>◦ I could draw base-ten blocks, a bar model, number bonds, or another type of picture.</li> <li>◦ Just changing the numbers in the equation into base-ten blocks does not show division.</li> </ul> </li> <li>• I can use words to explain what my drawing is showing.</li> </ul>		
		<b>Calculate</b>	<ul style="list-style-type: none"> <li>• I can use any strategy I know to solve the division problem.</li> <li>• I can show all of my work and not just the answer.</li> <li>• I can check my estimate to see if my answer makes sense.</li> </ul>		
		<b>Real Life/ Word Problem</b>	<ul style="list-style-type: none"> <li>• I can write a real-life example that shows division <u>OR</u></li> <li>• I can write a word problem that shows division.</li> <li>• I can use the same numbers that we’re using for the rest of this SNAP.</li> </ul>		
		<b>Reflect</b>	<ul style="list-style-type: none"> <li>• I can identify something specific that I was good at, something that was challenging, and something I want to work on (Strength, Stretch, Goal) <u>OR</u> I can write in detail about why I chose a particular strategy or how I solved a difficult problem.</li> <li>• I can think more deeply than “It was all easy,” “It was all hard,” or “I don’t know.”</li> </ul>		

Emerging	Developing	Decimal Multiplication - Proficient			Extending	
		Estimate	<ul style="list-style-type: none"> <li>I can use a strategy to change the numbers so they are “friendly,” then multiply to find my estimate (You might round or use a different strategy).           <ul style="list-style-type: none"> <li>Writing your estimate without showing how you found it is not enough.</li> </ul> </li> </ul>			
		Drawing and Explanation	<ul style="list-style-type: none"> <li>I can show that I understand multiplication with decimals using a drawing.           <ul style="list-style-type: none"> <li>I could draw base-ten blocks, a bar model, number bonds, or another type of picture.</li> <li>Just changing the numbers in the equation into base-ten blocks does not show multiplication.</li> </ul> </li> <li>I can use words to explain what my drawing is showing.</li> </ul>			
		Calculate	<ul style="list-style-type: none"> <li>I can use any strategy I know to solve the multiplication problem.</li> <li>I can show all of my work and not just the answer.</li> <li>I can check my estimate to see if my answer makes sense (check the decimal places!).</li> </ul>			
		Real Life/ Word Problem	<ul style="list-style-type: none"> <li>I can write a real-life example that shows multiplication <u>OR</u></li> <li>I can write a word problem that shows multiplication.</li> <li>I can use the same numbers that we’re using for the rest of this SNAP.</li> </ul>			
		Reflect	<ul style="list-style-type: none"> <li>I can identify something specific that I was good at, something that was challenging, and something I want to work on (Strength, Stretch, Goal) <u>OR</u> I can write in detail about why I chose a particular strategy or how I solved a difficult problem.</li> <li>I can think more deeply than “It was all easy,” “It was all hard,” or “I don’t know.”</li> </ul>			

## Percent of a Number - Proficient

Emerging	Developing		
		<b>Estimate</b>	<ul style="list-style-type: none"><li>• I can use logical reasoning or an estimation strategy to find an estimate.</li><li>• I can clearly explain how I found my estimate.<ul style="list-style-type: none"><li>◦ Writing your estimate without showing how you found it is not enough.</li></ul></li></ul>
		<b>Drawing and Explanation</b>	<ul style="list-style-type: none"><li>• I can draw a visual representation of the percent of a number.<ul style="list-style-type: none"><li>◦ I could draw a number line, a pie chart, a ratio table, or another type of picture.</li><li>◦ Just changing the numbers in the equation into base-ten blocks does not show this concept.</li></ul></li><li>• I can use words to explain what my drawing is showing.</li></ul>
		<b>Calculate</b>	<ul style="list-style-type: none"><li>• I can use any strategy I know to find the solution to the problem.</li><li>• I can show all of my work and not just the answer.</li><li>• I can check my estimate to see if my answer makes sense.</li></ul>
		<b>Real Life/ Word Problem</b>	<ul style="list-style-type: none"><li>• I can write a real-life example <u>OR</u> a word problem that demonstrates this concept.</li><li>• I can use the same numbers that we're using for the rest of this SNAP.</li></ul>
		<b>Reflect</b>	<ul style="list-style-type: none"><li>• I can identify something specific that I was good at, something that was challenging, and something I want to work on (Strength, Stretch, Goal) <u>OR</u> I can write in detail about why I chose a particular strategy or how I solved a difficult problem.</li><li>• I can think more deeply than “It was all easy,” “It was all hard,” or “I don’t know.”</li></ul>
